DETAILED ACTION

1. This communication is responsive to BPAI Decision filed on 03/24/2006. The Board reversed the examiner's rejection of claims 1-14.

Based on the Board decision that reversed the examiner's rejection, the examiner withdraws the finality of the rejection regarding claims 1-14 under 35 USC 103 (a), and reopens the examination for the instant application.

Drawings

2. Even though the amended drawing (Fig.1) filed on 01/13/2003 is accepted by the examiner, it is should pointed out that an formal copy of Fig. 1 is required (removing the cancelled function blokes).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it recites a limitation of "indication signal" generated by a terminal. However, the claimed limitation fails to specifically point out what the signal really indicates, which causes the limitation in uncertainty so as being indefinite. In addition, the claim also lacks

Art Unit: 2626

providing a clear relationship between the components of “vocal commanding” and the “indication signal”, which further causes an incompleteness problem for the claim.

Regarding claims 4, 7 and 10, the rejection is based on the same reason described for claim 1, because the claims respectively include the same or similar limitation with the same problem as claim 1.

Regarding dependent claims, the rejection is based on the same reason described for claims 1, 4, 7 and 10 respectively, because the dependent claims inherit the same or similar limitation with the same problem as their parent claims.
